GE Infrastructure
Water & Process Technologies

There is nothing more important than being able to
deliver clean and safe drinking water to every
person, in every region of the world.

That's why we've combined Betz, Osmonics and
Glegg into one powerful solution-providing force —
GE Infrastructure Water & Process Technologies.

Making drinking water safe for everyone around
the world by using our knowledge, years of
problem solving expertise, and innovative products.

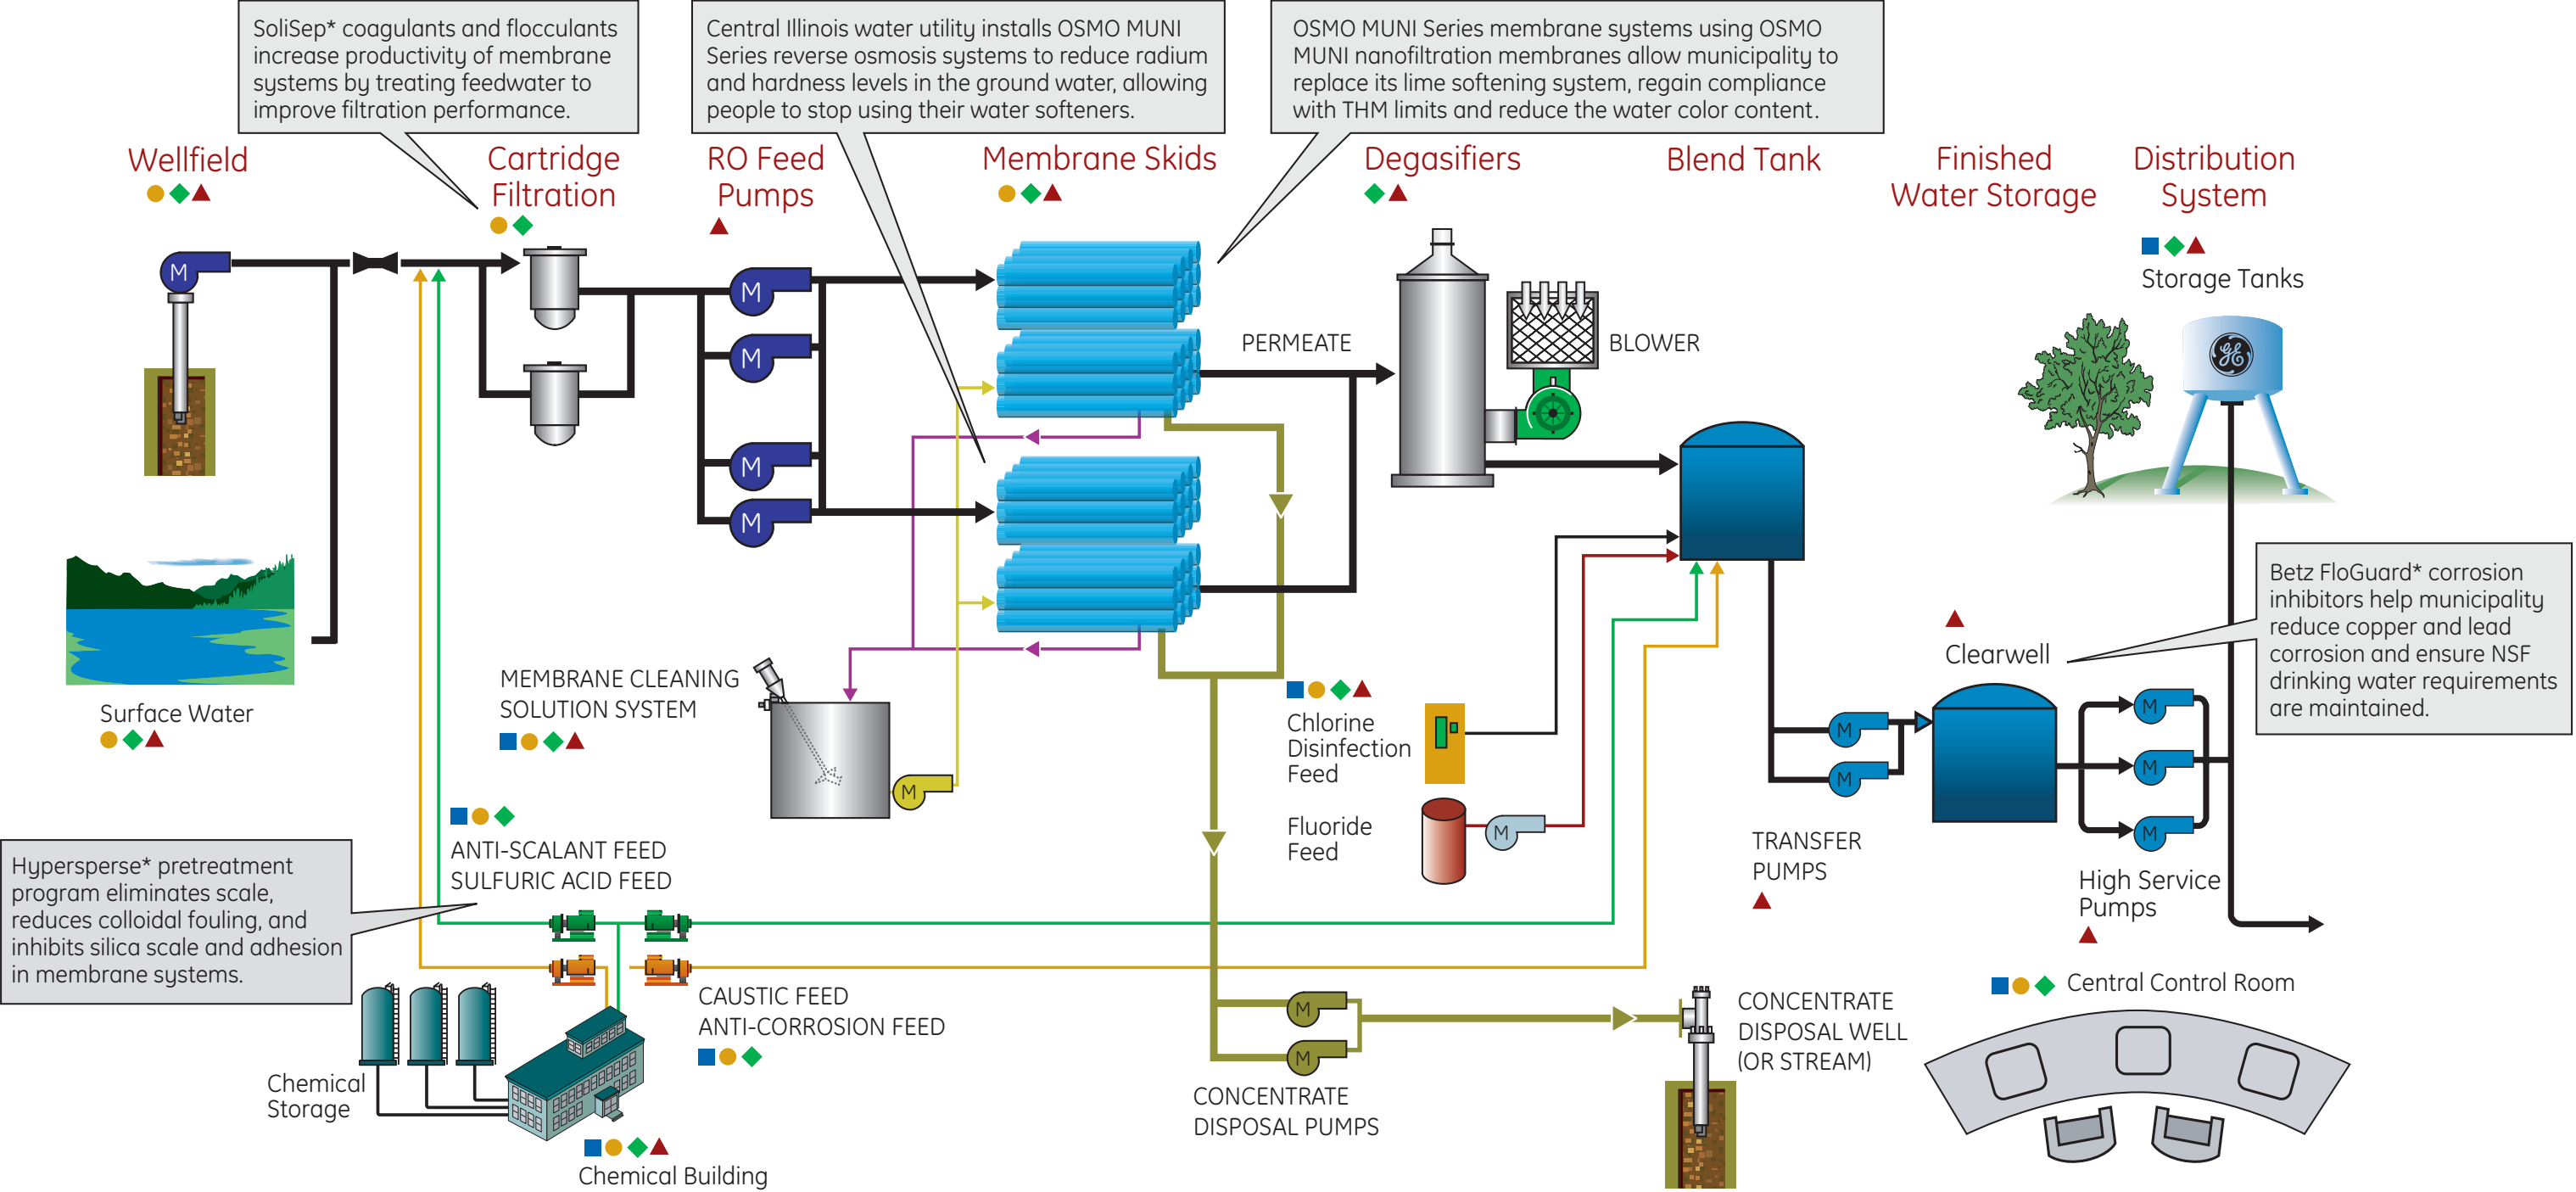

Over 1 billion[†] people do not have
access to safe drinking water...

GE is changing that.
