

PHARM Series

Pre-Engineered USP Purified Water Systems for Pharmaceutical Applications

The PHARM series from GE Water & Process Technologies offers an innovative approach to the supply of purified water designed specifically for the pharmaceutical, biotech and healthcare industries. These proven, pre-engineered designs are easily validated and produce USP quality water day-in and day-out.

Industry Leader

GE is the leading manufacturer of reverse osmosis (RO) systems and components, worldwide. With over 40 years of experience in membrane technologies, we have provided solutions to hundreds of satisfied customers in the pharmaceutical, biotech and healthcare industries.

Our vertically integrated approach to system manufacturing is unmatched because we manufacture all the major components within the PHARM Series purified water systems. All manufacturing is done in an ISO 9001 certified facility and backed by the Six Sigma quality program.

Systems Highlights

- Pre-engineered designs for production of 5 to 120 gpm (0.02 to 0.45 m³/h) of USP purified water.
- Completely skidded designs for ease of installation
- Validation support documentation standard
- Chemical and hot water sanitizable system designs available
- Small footprints to fit even the most congested spaces
- Quick delivery – your system installed at your site in weeks, not months
- Dedicated GE project management from order placement to successful commissioning of your system

Only GE

GE is the only vertically integrated supplier of USP purified water systems. We offer a true single point of accountability with the in-house manufacture of the most critical components that make up each system:

- Cartridge and depth filters
- Tonkaflo multi-stage centrifugal pumps
- Stainless steel membrane housings
- NSF-approved, Class VI tested RO membrane elements
- E-cell electrodeionization units
- Ozone generation systems

The GE Advantage

- Unparalleled 24/7/265 service available worldwide from hundreds of factory-trained regional service specialists
- Service and consumables supply agreements for complete system support
- Complete system financing packages available
