

Rapid Response and Temporary Water Services

GE's Water & Process Technologies, is a global leader in the design, fabrication, installation and operation of membrane based water and wastewater treatment technologies and solutions. GE water treatment systems are used to purify drinking water, produce high quality process water, and treat wastewater for discharge or reuse.

GE offers a complete line of pre-engineered, packaged and mobile membrane plants that provide quick and reliable water and wastewater treatment solutions for a wide range of municipal, industrial and military applications. The systems are easily transportable and consistently produce high quality water that meet the world's most stringent requirements.

DRINKING WATER PRODUCTS

Homespring* Water Filtration System 200 to 20,000 GPD

- Utilizes ZeeWeed* Ultrafiltration Membranes
- Ultra compact footprint allows it to be placed virtually anywhere
- NSF 53 and 42 certification
- Fully self-contained system
- Automated self cleaning system with no need for pumps or blowers

Z-BOX* S Up to 400,000 GPD

- Designed to operate in the harshest environments and treat the most difficult water sources
- Fully integrated skid mounted system
- CDHS tested
- Compact footprint
- Highly automated and PLC controlled

Mobile ZeeWeed Ultrafiltration System 600,000 GPD to 1.7 MGD

- Easily transportable
- Fully tested and ready for installation
- Proven, reliable barrier technology
- Fully automated for ease of operation
- Minimal installation time required

WASTEWATER TREATMENT PRODUCTS

Z-MOD* M Up to 110,000 GPD

- Fully integrated skid mounted membrane system
- Can be incorporated into existing or new biological processes
- Compact footprint
- Utilizes reinforced, ultrafiltration membrane technology
- Highly automated and PLC controlled

Z-MOD L Up to over 1 MGD

- Fully tested and ready for installation
- Overall recovery 90-95%
- Fully automated for ease of operation
- Available for fast delivery
- Minimal installation time required

INDUSTRIAL PROCESS WATER SYSTEMS

Mobile ZeeWeed Ultrafiltration System 600,000 GPD to 1.7 MGD

- Fully tested and ready for installation
- Tolerates up to 1,000,000 ppm-hours of hypochlorite
- Overall recovery 90-95%
- Fully automated for ease of operation
- Available for fast delivery
- Minimal installation time required

Mobile Reverse Osmosis (RO) Filtration System 120 and 220 GPM

- Easily transportable
- Fully tested and ready for installation
- Complete with all ancillary equipment
- Fully automated for ease of operation
- Available for fast delivery
