

Steamate* NF

Control Condensate Corrosion and Minimize Total Cost of Ownership

With Steamate NF treatment, you:

- Reduce costs of system corrosion
- Reduce cost of corrosion control
- Extend equipment life
- Gain consistent corrosion control across a broad pH range

Steamate NF programs handle variations in:

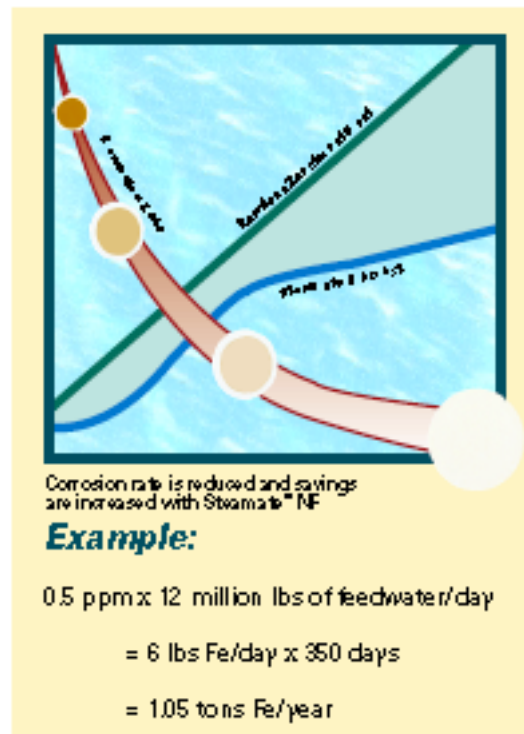

- Steam use
- Feedwater alkalinity
- System configuration
- Oxygen contamination
- Providing performance you need at a cost lower than conventional neutralizing amine treatment

Your GE Water & Process Technologies representative provides:

- Detailed system analysis
- Condensate system modeling
- Effective treatment and monitoring to ensure consistent performance without underfeeding or overtreatment.

The results:

- Increased efficiency and reliability provides peace of mind
- Easy and safe chemical delivery and feeding reduce operator involvement
- Reduced cost of ownership helps cut operating budgets
