

# Dianodic\* III

## Take System Performance To New Heights

Dianodic III delivers out of this world, cost-effective, corrosion protection.

With Dianodic III, a Halogen Resistant Azole (HRA) provides unparalleled corrosion protection through the world's only halogen stable neutral pH cooling water treatment program. New dispersant technology delivers unmatched fouling and scale control.

### Dianodic III:

- Reduces total cost of operation
- Extends equipment life

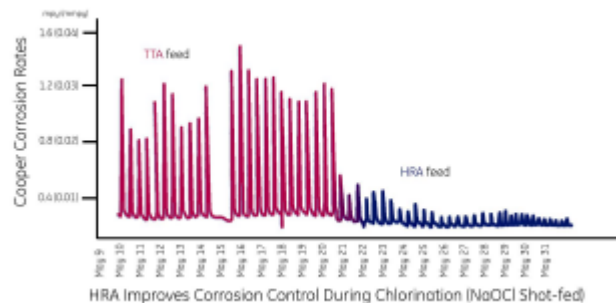

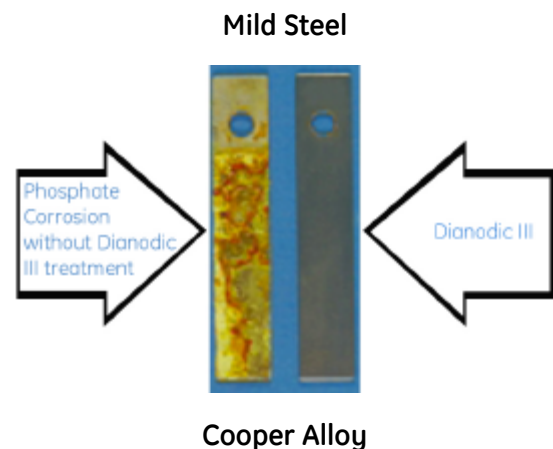

### Fortified for Unsurpassed Cooling Water System Reliability:

- Stable in the presence of halogen-based biocides
- Minimizes downtime and unscheduled outages
- Improves heat transfer
- Guards against pitting corrosion
- Reduces copper discharge

Ask your GE Water & Process Technologies representative to show you how Dianodic III can take your system performance to new heights.

### Corrosion Performance

Under High Halogenation Conditions
