GE Power & Water
Water & Process Technologies

Access

The screenshot shows the GE Power & Water website header. The GE logo is on the left, followed by the text 'GE Power & Water Water & Process Technologies'. Social media icons for Twitter, YouTube, and LinkedIn are on the right, along with a search bar. The navigation menu includes 'About Us', 'Industries', 'Applications', 'Products', 'Resources', and 'Online Store'. The 'Resources' menu is open, showing a table of links. The 'Document Library' and 'Search Library' links are highlighted with an orange box. Below the navigation, there is a banner for 'BIG DATA WEBCAST' with the text 'Leave the Place of Decisions, Arrive at the Future of Big Data' and a 'Watch the trailer' button. The footer contains three sections: 'WHO WE ARE', 'INDUSTRIES WE SERVE', and 'HOW WE CAN HELP'.

Welcome to the GE Water & Process Technologies Document Library

Use the search box at the top of this page to find documents - you can do so in combination with filters by clicking on the "Perform an advanced search" link. For example, if you are looking for Case Studies about our GenGard product, you can type "GenGard" in the search box, then click the Advanced Search and choose "Case Studies" from the Document Types options.

The "Shortcuts" feature allows you to navigate quickly to the most popular document types. Please note that you can also simply filter down to documents without typing anything in the search box.

By default, the search results show documents in all languages, applicable to all poles – you can narrow down your search and filter to a particular language/pole as required.

For Help with this Document Library, we recommend that you read our Training Presentation (explanatory screenshots with comments): click on "Help" in the top right corner. It will take you only 5 minutes!

Note that our MSDS (Material Safety Data Sheets) are available from the menu in the black band above – click on "Resources".

This training presentation is available via the "Help" link (top right corner and underneath search box)

To access the full breadth of resources in our library, new users can create an account to register.

[Help](#)

You can immediately use the Library search from the home page:

1. Type a **query** in the white search box, or
2. Use one of the **shortcuts** to frequently used **document types** (you can refine your search further afterwards), or
3. You can **combine** these features (i.e. type something in the search box and then click on e.g. the Fact Sheets shortcut)

In addition, there is the option to perform an **advanced search** (orange link underneath the search box) by applying several filters in one go – more on this later.

To just search, click the magnifying glass icon () or the “Enter” key after typing your query.

Remember that you do not necessarily need to type something in the search box, you can limit yourself to just using the filters, or combine search term and filters.

Search Results

Amount of search results matching your query and applied filters

Search results are displayed sorted by **relevance** first, but you can easily **sort them alphabetically (A-Z, by title)** – this is especially useful when browsing for fact sheets

You can change the **amount of results** displayed per page

Number of pages with search results (will vary according to chosen amount of results per page)

E8 Plus Series 50/60 Hz
FACT SHEETS | AMERICAS,ASIA/PACIFIC,EMEA
E8 Plus Series 50/60 Hz - Reverse Osmosis Machine 216,000 to 288,000 gallons per day (34-45 m3/hr)
DOWNLOAD (PDF, 238.7 KB) + More info

SeaPRO-E-210 - 2500 m3/day (460 gpm)
FACT SHEETS | AMERICAS,ASIA/PACIFIC,EMEA
A product of ecomagination. Fact sheet for SeaPRO-E-210 - 2500 m3/day (460 gpm) Seawater Desalination Machine.
DOWNLOAD (PDF, 109.0 KB) + More info

Modular Ultrapure Water Plant Facts (HERO)
FACT SHEETS | AMERICAS,ASIA/PACIFIC,EMEA

Here you can **modify Filters** – more on separate “Filters” slides

The **pole** choice in the filters restricts the search to products and equipment **relevant to your region**. Please note that many products are **specific to an area or country**. The pole you have chosen will limit your Library search to display only results relevant to that pole, although you can change this choice at any time when applying filters.

By clicking on “**Perform an advanced search**” you can open the so-called **Filter Modal** from the **Home Page**. Note that you can do this in combination with a typed search query.

Choose **up to 10 filters** (you will get a warning when you exceed that number), then click on the “**Apply Filters**” button.

Clicking on “**Reset**” will cancel all filters (you can also un-do them one by one)

Modify Filters

Document Types

- All Types
- Analytical Procedures
- Capabilities Brochures
- Capability Profiles and FAQs
- Case Studies
- Customer Benefits

- Chemicals** (Modify)
 - Boiler Water Chemicals
 - Cooling Water Chemicals
- Equipment** (Modify)
 - None Specified
- Services** (Modify)
 - Field Test Services

Filters

When choosing a category under Chemicals, Equipment or Services, you can either tick off **“All XXX”** which will filter down to all documents tagged to that category, or you can choose a **sub-type** and/or **product series** (remember to scroll down in the filter modal to view them all).

The image shows a user interface for filtering documents. On the left is a vertical navigation menu with categories: Document Types, Poles, Languages, Industries, Chemicals, Equipment, and Services. Each category has a 'Modify' link. The 'Chemicals' category is highlighted, and its 'Modify' link is circled in orange. An arrow points from this link to the 'Modify Filters' modal window on the right. The modal window has a blue header and a close button. It shows a list of categories on the left, with 'Chemicals' selected. Under 'Chemicals', 'All Chemical Feed & Process Control' is checked and circled in orange. Below this, there is a section titled 'Choose specific Sub-Types & Product Series:' with several checkboxes: Controllers, Fluid Transfer, Liquid Storage & Delivery, Miscellaneous, Sampling & Detection, Software & Digital Services, Specialized Dosing, AccuTrak, and TrueSense. A scroll bar on the right side of the modal is also circled in orange. At the bottom of the modal are 'Apply Filters' and 'Reset' buttons.

- To **copy the URL** of a specific document in order to email it to someone, **right click on the title of the document** and click on 'Copy Shortcut', then paste this into the email or document.
- To **save a document** straight to your hard disk, right click on the title of the document, and choose "Save Target As..."

Search Tips

- When entering multiple words, an **'AND' search** is done by **default**:
Search query 'sulfuric acid' is the same as search query 'sulfuric and acid'
A document will appear in the search results if it contains the word 'sulfuric' AND the word 'acid' anywhere in it (the words do not need to be in sequence).
- Insert the search string in **quotation marks (" ")** to search for the **words in sequence**:
Search query: "sulfuric acid"
A document will appear in the search results if it contains the words 'sulfuric acid' in sequence.
Using the quotation marks around keywords is very helpful when you want an exact phrase. For example, if you type the following query: "French fact sheet", the search engine will literally look for the complete phrase 'French fact sheet'. But, if you type the same query without the quotation marks then it searches all documents containing the words 'French', 'fact' and 'sheet'.
- Use an **asterisk (*)** after, in front of or even in the middle of your search term as a **wildcard character** for partial product name or word searches :
Search query: "BA29*" to search for "BA2920", "BA2980MBR" etc
Search query: "gen*ard" if you're not sure it should be spelled "gengard" or "genguard"
- Note that **product name extensions** (eg. XYZ123) are always written in **one word**
- Try **alternative spelling** in your search queries, e.g. American English vs. British English (sulfuric vs sulphuric)...
